Project Cost
by Olympic Systems

Project Cost is a Full Featured Project Accounting Solution for Microsoft Dynamics GP

- **Tightest Integration to Microsoft Dynamics GP**
  Project Cost eliminates unnecessary key strokes and double entry by integrating to the native GP transaction entry windows. Project Cost is integrated with Payables, Receivables, Inventory, Sale Order, Purchase Order, Payroll, General Ledger, and Smart List modules.

- **Most Advanced Silverlight & .NET Web Portal in the Industry**
  Users can logon anywhere/anytime to record Time & Expense information.

- **Report Expenses from the Web**
  Multiple Currency Expense Transactions
  Use Company Credit Cards
  Attach Scanned Receipts
  Manage Expense Tax Assignments for GST/VAT

- **Security & Permissions**
  Set Access Rights & Duties by User, Group, Project or Task.

- **Designed to Meet the Needs of Government Contractors**
  Project Cost meets contract accounting requirements for Government Contractors as specified by the Federal Acquisition Regulations Supplement (FARS) as implemented by agencies such as the Defense Contract Audit Agency (DCAA)

- **Powerful Project Cost Management Tools**
  Project Cost provides a series of tools designed to make projects easy to manage and understand. Create, View and Edit Projects in an easy to use Tree View window. Managers can use powerful Budgeting and Project Analysis Tools to track the Revenues & Expense spending for any project. Compare Actual vs. Budget and quickly drilldown to investigate variances.

- **Single Entry Automation**
  Project Cost automates the creation of invoices, employee expense transactions, payroll transactions, project budgets, project purchase orders and much more.

- **Easy Reporting**
  With over 100 customizable reports and inquiries along the power of SmartList for ad hoc reporting – Project Cost provides the appropriate management information in an environment that can withstand both current and historical audit scrutiny.
